

FORTY-FOURTH ANNUAL REPORT

OF THE

Indiana School
for Feeble-Minded Youth

Fort Wayne, Indiana

For the Fiscal Year Ending
September 30, 1922

To the Governor

JUL 11 1969

FORTY-FOURTH ANNUAL REPORT

OF THE

Indiana School
for Feeble-Minded Youth

Fort Wayne, Indiana

For the Fiscal Year Ending
September 30, 1922

To the Governor

INDIANAPOLIS:

WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING

1923

REPORT OF THE INDIANA SCHOOL FOR FEEBLE-MINDED
YOUTH

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
February 13, 1923.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, February 13, 1923.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

ROBERT BRACKEN,
Auditor of State.

OFFICE OF THE GOVERNOR,
February 13, 1923.

Returned by the Auditor of State, with above certificate, and transmitted to the clerk of the Printing Board, upon the order of the Board of Public Printing.

ADAH E. BUSH,
Secretary to the Governor.

OFFICE OF THE BOARD OF PUBLIC PRINTING,
February 13, 1923.

Received the within report and delivered to the printer February 13, 1923.

THOS. J. CARTER,
Clerk Printing Board.

BOARD OF TRUSTEES

JAMES W. SALE, *President*.....Bluffton
THOS. F. FITZGIBBON, *Vice-President*.....Muncie
FRANCES BEARSS GOULD, *Secretary*.....Peru
EDWARD M. WILSON, *Treasurer*.....Fort Wayne

EXECUTIVE OFFICER

BYRON E. BIGGS, M. D.....Medical Superintendent.

RESIDENT MEDICAL STAFF

L. POTTER HARSHMAN, M. D.....Assistant Physician
NELLIE J. HANAWAY, M. D.....Assistant Physician
HARRY W. GARTON, M. D.....Assistant Physician
R. C. LEONARD, D. D. S.....Dentist

CONSULTING MEDICAL STAFF

MILES F. PORTER, M. D.....Surgical Consultant
H. A. DUEMLING, M. D.....Surgical Consultant
CHAS. G. BEALL, M. D.....Medical Consultant
H. E. GLOCK, M. D.....Eye, Ear, Nose and Throat

HEADS OF DEPARTMENTS

EDNA R. JATHO.....Psychologist
THERESA DOYLE.....School Principal
L. THOMAS HURLEY.....Chief Clerk
MARGARET TOWNSEND.....Supt.'s Secretary
MRS. FRANCES HILDRETH.....Matron
C. F. MARTIN.....Chief Engineer
FRED L. TILBURY.....Supt. of Construction and Repairs
JAMES G. JACKSON.....Supt. of Farms
OSCAR BELL.....Outside Overseer

FORTY-FOURTH ANNUAL REPORT OF THE INDIANA SCHOOL
FOR FEEBLE-MINDED YOUTH.

To the Honorable Warren T. McCray,
Governor of the State of Indiana.

Sir: We have the honor to herewith submit the forty-fourth annual report of the Indiana School for Feeble-Minded Youth for the fiscal year ending September 30, 1922.

ORGANIZATION.

There has been no change in the personnel of the board since the last report, and the organization remains as follows:

JAMES W. SALE, Bluffton.....President
THOS. F. FITZGIBBON, Muncie.....Vice-President
MRS. FRANCES BEARSS GOULD, Peru.....Secretary
EDWARD M. WILSON, Fort Wayne.....Treasurer

On June 1, 1922, Dr. Byron E. Biggs became superintendent of our Institution. Dr. Biggs comes to us with unusual equipment for his work, both by training and experience. He was for more than three years a member of the medical staff of the State Hospital for Insane at Ionia, Michigan, was assistant superintendent of the Michigan Home and Training School for eight and one-half years, and built and developed the Mississippi School and Colony for Feeble-Minded during the two years previous to his coming to us. Dr. Biggs has plans well under way for out-field clinic work for the state, and is planning to put our Institution in close co-operative touch with the public schools in the solution of our problems arising from our mental defectives.

Dr. L. Potter Harshman continues as resident physician, and Dr. Nellie J. Hanaway as assistant. Dr. Harry Garton has been added to the staff during the year. To insure the greatest efficiency in the supervision and care of the children, each physician is held personally responsible for a group of buildings and the welfare of the children housed therein.

Dr. R. C. Leonard became resident dentist during the year.

In accord with our plan to make more complete mental classification of our children in the Institution and to provide a traveling clinic for the state, Miss Edna Jatho, eminently fitted for the place by both training and experience, has been selected as psychologist. The staff of the traveling clinic will soon be complete.

No other important changes have occurred in the administrative force of the Institution, but there has been the usual turnover in the general help incident to institutions of this character, which adds to the problems of administration and the burdens of the superintendent.

EDUCATIONAL, RELIGIOUS AND RECREATIONAL ACTIVITIES.

The curriculum of the educational department under the direction of Miss Theresa Doyle, principal, has been revised in accordance with the findings revealed in the mental study of the children. Manual work suitable to the different classes of children is applied and a manual arts shop for boys, with a well trained teacher, has been established. This shop is to provide shop experience for the boys in school and provide training in farm mechanics for the older boys on the farm. Industrial training for the older boys and girls is being greatly extended.

We expect to offer the teacher training schools of the state an opportunity to send teachers in training for work among children of the defective type in the public schools to our school for observation and practice, thus fitting teachers for specific work among subnormal children.

Regular religious services is a part of the daily life program of the Institution. Definite religious exercises in the chapel and the home buildings add greatly to the contentment and peace of our population.

The recreational activities are a marked feature of the life of the population. Playground apparatus is provided for each home playground and general playground. Picnics are conducted in season. Athletic contests are promoted. Special anniversaries are observed. Dramatic, musical and moving picture performances are held. We here wish to express to the teachers and attendants our sincere appreciation for their skill and leadership in guiding the recreational activities of the Institution.

GROWTH AND HEALTH.

The number enrolled at the close of the year was slightly in excess of the number enrolled at the beginning of the year. There were 92 admitted during the year. There were 26 deaths during the year and 51 left the school permanently for various reasons. The waiting list is growing larger year by year, and there is an ever increasing number of applications for admission, as the people of the state more fully appreciate the work of the Institution. So insistent has been the knock at our doors that every department is greatly overcrowded. Should the state remove from our institution the large number of epileptic women when the department for women at the Epileptic Village at New Castle is completed, we would be able to accommodate a large number of most distressing and menacing cases now at large and without care in the state.

The mortality for the year, 26, was quite low, being only 1.9%. The Institution was singularly free from epidemic and the health was excellent for a population having, naturally, such a large per cent with low power of resistance. The expert medical care given, together with the excellent sanitary condition of the buildings, the wholesome food served and the well planned work and recreation for the population account for the desirable health conditions.

FARM OPERATIONS.

We desire to call your attention to the farm activities for the year. Food valued at \$43,163.96 was produced for use in the Institution. Our boys are adjusted to our farm operations according to their several inclinations and capacities, and all of them find agreeable and beneficial employment all year. Our great variety and quantity of farm, dairy and meat products add greatly to the efficient and economic serving of an institution like ours. We trust that we may soon be able to establish a colony for women where they may be profitably and pleasantly employed in gardening, fruit growing and poultry raising. Many improvements have been made in lands, buildings and stock during the year.

We here wish to make grateful acknowledgment of our appreciation for the fine spirit of co-operation in the Institution and the untiring efforts of the superintendent, the heads of departments, the assistants, the attendants and all other employees in ministering to the unfortunate groups living in the Institution. A service of great value has been rendered to the state.

EXPENDITURES.

The following is a general statement of the expenditures for the year:

Salaries and wages.....	\$100,565 83
Subsistence	47,334 59
Clothing	12,914 85
Office, domestic and outdoor departments.....	101,069 37
Ordinary repairs and minor improvements.....	17,500 00
Extraordinary expenses	12,970 87
	<hr/>
Total	\$292,355 51

The cost per capita, maintenance, was \$186.59. The cost per capita including ordinary repairs was \$199.06. We respectfully call your attention to the detailed statement of receipts, expenditures, production and activities set forth in the reports of the superintendent and his staff.

THE NEEDS OF THE INSTITUTION.

REGULAR APPROPRIATIONS.

The maintenance fund for each year of the next biennial period should be at least \$250.00 per capita on a basis of 1,400 inmates and \$250.00 per capita for all inmates in excess of 1,400 in daily average attendance; the excess daily average to be approved by the Board of State Charities. We will need per annum for maintenance \$353,960.00; for repairs and painting, \$22,000.00.

SPECIFIC APPROPRIATIONS

1. The overcrowded condition of the adult female department and the large number of such females yet at large and uncared for in the state make it imperative to provide more room for this class of inmates. We feel that a colony house, preferably on Black Hawk farm, would be the best solution of this problem. For this colony house \$75,000.00 would be required. This fund to be made available October 1, 1923.

2. Many of our crippled children are without hospital care, and there are many such crippled feeble-minded children in the state wholly without proper care, that we find it most desirable to add a wing to our hospital for the care of crippled children who are mental defectives. About \$60,000.00 would be required for this building. Fund to be available April 1, 1923.

3. The plumbing in Sunset and the Boys' Cottage is in bad condition and must be improved as a means of safety to life and property. An appropriation of \$10,000.00 should be made for each of these cottages to be available April 1, 1923.

4. Some twenty-five wooden partitions in the wings of the Administration building should be removed because they greatly add to the fire hazard, and they are a harbor for bugs and vermin. \$2,500.00 will be required for this improvement and should be made available April 1, 1923.

5. Both Sunset Cottage and the Farm Colony building are very inadequately ventilated, endangering the health of the inmates. This improvement will require \$1,500.00, which should be made available April 1, 1923.

6. The cottage at the Parker farm is in need of extensive repairs. To do this work, \$1,500.00 will be needed and should be made available April 1, 1923.

7. If funds are appropriated for buildings, the brick plant should be put in order as a matter of economy in furnishing building material. The repairs would require \$2,500.00, and \$6,000.00 would be needed for operation. These sums should be made available April 1, 1923.

8. The laundry is wholly inadequate to care for the needs of the Institution. For this improvement, \$30,000.00 will be required and should be made available October 1, 1923.

9. One of the boilers in the power plant is permanently out of commission. We really now have no emergency power. A further breakdown would be a menace to the safety of our Institution. The sum of \$5,000.00 will be required to put the plant in safe condition and should be made available April 1, 1923.

10. In July fire destroyed our paint shop with quite a store of paint and glass. A fireproof shop should be provided. The sum of \$2,500.00 will replace the building and should be made available April 1, 1923.

11. The greenhouse is much in need of repairs and should be enlarged to take care of the demands of the Institution. There should be

appropriated for this purpose \$1,000.00, which should be made available April 1, 1923.

12. New pavements are needed about the Institution grounds and present pavements are much in need of repair. The sum of \$5,000.00 will be needed for this work and should be made available April 1, 1923.

13. On account of the urgency of the season, the drainage at Black Hawk farm was not completed and \$1,737.55 of the original appropriation reverted to the state. To complete this work \$2,500.00 should be appropriated and made available October 1, 1923.

14. Poultry raising would be a very profitable addition to the farm activities on the Black Hawk farm. A tool house is also a necessity. It would require \$2,000.00 to build this combination house. This sum should be made available April 1, 1923.

Recapitulation of the Regular and Specific appropriations with estimated cost of same:

	Regular	Specific
Maintenance (1924)	\$350,000 00	
Maintenance (1925)	350,000 00	
Repairs and painting (1924)	22,000 00	
Repairs and painting (1925)	22,000 00	
Colony house for adult women		\$75,000 00
Wing to hospital		60,000 00
Plumbing for Sunset and Boys' Cottages		20,000 00
Replacing wooden partitions		2,500 00
Ventilating cottages		1,500 00
Repairing Parker farm cottage		1,500 00
Brick plant fund		8,500 00
Laundry building		30,000 00
Boiler replacement		5,000 00
Paint shop		2,500 00
Greenhouse repairs and enlargement		1,000 00
Pavements		5,000 00
Drainage at Black Hawk farm		2,500 00
Poultry and tool house		2,000 00
Total	\$744,000 00	\$217,000 00

In conclusion we wish to express to you our grateful appreciation for your personal interest in the institution and its problems and for your most helpful counsel at all times.

Respectfully submitted,

JAMES W. SALE.
T. F. FITZGIBBON.
FRANCES BEARSS GOULD.
EDWARD M. WILSON.

REPORT OF SUPERINTENDENT.

To the Board of Trustees:

I herewith submit the superintendent's forty-fourth annual report of the Indiana School for Feeble-Minded Youth for the fiscal year ending September 30, 1922.

MOVEMENT OF POPULATION.

	Boys	Girls	Adult Females	Total
Enrolled September 30, 1921.....	599	560	280	1,439
Admitted during the fiscal year.....	59	25	8	92
<hr/>				
Total enrollment	658	585	288	1,531
Died during the fiscal year.....	10	10	6	26
Discharged during the fiscal year....	35	12	4	51
<hr/>				
Total died and discharged... ..	45	22	10	77
Enrolled September 30, 1922.....	613	563	278	1,454
Absent September 30, 1922.....	17	13	1	31
<hr/>				
Actual number present Sep- tember 30, 1922.....	596	550	277	1,423

	Males	Females	Total
Daily average present for fiscal year ending September 30, 1922.....	577.425	826.109	1,403.534

	Boys	Girls	Adult Females	Total
Applications presented	63	40	16	119
Applications accepted	60	38	16	114
Applications rejected and deferred... ..	3	2	0	5
Applications pending and not accepted	3	2	2	7
Applications accepted pending room on file September 30, 1922.....	21	93	38	152

DISTRIBUTION OF POPULATION.

	Enrolled	Beds
Main building, girls	287	287
Main building, boys	228	214
Custodial Cottage for boys.....	185	187
Cottage, Colony Farm, boys.....	179	182
Cottage, Black Hawk Farm, boys.....	12	15
Cottage for adult females.....	272	263
Custodial Cottage for girls.....	183	196
Girls' Home Cottage	79	80
Residents in hospital	29	29
<hr/>		
Total	1,454	1,453

ADMISSIONS.

The tables above show that there were 92 admissions: 59 males and 33 females. Of these, as will be found tabulated elsewhere, 18 were idiots, 42 were imbeciles and 32 were morons. Many of the idiots were helpless cripples requiring hospital care.

APPLICATIONS.

There were 119 applications presented, of which 114 were accepted: 60 males and 54 females. We have admitted the most urgent cases, with particular reference to the quota rights of the different counties and priority claims of previous applicants. Applications, however, continue to exceed the admissions so that we have on file applications pending room to the number of 152: 21 males and 131 females.

Although the table "Distribution of Population" appears to contradict, the departments for females are filled to capacity. The apparent difference is explained when it is known that just before the close of the fiscal year there were a number of deaths and withdrawals. Applicants to take these vacant beds had been sent for, but had not yet arrived at the School. A re-distribution of the male population will permit the immediate admission of the 21 boys.

DISCHARGES.

There were 26 discharges by death: 10 males and 16 females. The causes of death are shown in the physician's report following. Of the 35 boys discharged, 24 went home on furlough and were not returned, 7 strayed, and 4 were discharged to the care of relatives. Of the 16 girls discharged, 8 were not returned from furlough, 1 strayed, 5 who were insane were transferred to state hospitals, 1 was discharged to the care of relatives, and 1, who had been sent to a general hospital for special treatment, was not returned.

PAROLED.

Three boys were paroled to relatives, and all are reported as being employed and doing very well. One is earning \$20.00 a week. Nine girls have been paroled; four to the care of relatives, and five to carefully selected homes, where they are employed as domestics. Weekly or semi-monthly reports are received from these, and occasional visits made to them. All are reported as being very satisfactory to their employers and getting along very well.

MEDICAL.

In order to carry out the program adopted by your board of trustees, it has been necessary to increase the number of physicians of the medical staff and reorganize the system of administration. I feel that we are very fortunate in retaining the services of Dr. L. Potter Harshman and Dr. Nellie J. Hanaway, and in securing those of Dr. Harry Garton as assistant physician, and Dr. R. C. Leonard as resident dentist.

As the care and training of mental defectives in institutions is largely a medico-educational problem, the departments housing children have been divided into three groups, each in charge of a member of the staff. Each assistant physician is, therefore, responsible to the superintendent for the health, general care and training of the children, and the sanitary condition of the buildings in his or her group.

The general health of the School population has been very good. The reports of the chief medical officer, and dentist exhibited hereafter, describe the measures used to prevent epidemics and maintain the health of the children and show the number and variety of ailments treated.

PSYCHOLOGICAL.

In order to make more thorough studies of the mental status of our children and to make possible that part of your program that purposes to extend the expert service of our staff to the communities, a Department of Psychology and Research was established in September. Miss Edna Jatho of Philadelphia has been employed as psychologist. A complete psychological and psychiatric examination is to be made of each child, and the plan of training for each will be based upon the results of these examinations. This department, with a physician and a social worker, will in the near future serve outside communities as an out-patient traveling clinic. A description of the work accomplished to the end of the fiscal year will be found in a separate report.

EDUCATIONAL.

The Educational Department has been reorganized with Miss Theresa Doyle in charge. A number of new teachers have been employed to take the places of those who resigned at the close of the last school year. A male manual training teacher has been secured, and it is planned to add many new forms of manual work to those already established.

All of the school children have been given psychometric tests, and the curriculum planned for each has been based upon the results of these tests, giving due regard to previous training. By these tests the mental age of a child can easily be ascertained, and as each mental age has a corresponding scholastic possibility, we know what school grade work the child should be capable of doing. For instance, a child with a mental age of six can be taught the work of the first grade, but not the work of the second grade. If he has a mental age of seven, he can do the work of the second grade, but not that of the third, etc. As a defective child's mental age does not develop with his chronological age, he is only capable of mastering the work of his grade at the same rate that his mental age develops. It may require, therefore, two, three or four years before he can be advanced to the next grade. With a knowledge of his mental age, we can compute his intelligence quotient or percentage of average mental development. This figure enables us to predict the probable adult mental development and the probable limit of school progress.

Manual and industrial ability also closely corresponds with mental age and intelligence quotient. A child with a low mental age and intelligence quotient can only do simple tasks, while one with a higher mental age can do more complicated work.

It should be stated, however, that personality traits and disposition may modify both scholastic and industrial achievement. A willing child will learn to do better work than one who is contrary or easily discouraged.

There is no well-defined limit to the amount of information that a child may acquire at his mental level; so to make a child as useful, helpful, and therefore, happy as possible, our plan of training is to give him as great a number, variety, and repetition of experiences as possible at each mental level of his development. In addition to the scholastic work, training for girls consists of basketry, weaving, plain and fancy sewing, and other branches of domestic science; while for boys, it is the use of carpenter tools, painting, weaving, tailoring, shoe making, mattress making, etc.

INDUSTRIAL.

The industrial work is carried on in connection with the educational activities with the purpose of giving each child as many experiences in each department as possible. The canning and dehydrating plant has been only partially completed. An emergency canning plant was set up in the main kitchen. Some canning and dehydrating was done, but the construction of the plant was not sufficiently advanced to make it possible to do very much before the season was over. The work accomplished in the several departments is shown in reports appended.

AGRICULTURAL.

This important industry, under the supervision of Mr. J. G. Jackson, has again made a very creditable showing. The total value of food produced for the School is well over \$43,000.00. The total cost of farm operations is \$18,896.67, while the net gain or profit is \$24,351.24. On the whole, compared with the preceding year, a greater quantity of farm products were raised, but on account of the lower prices prevailing, these do not show as great in monetary value. For the same reason the net gain over operating expenses falls short of that of last year.

The Colony and Black Hawk Farm products are divided as follows:

Orchard and small fruits.....	\$2,706 38
Garden vegetables	9,913 03
Farm crops and potatoes	3,460 03
Beef, milk, dairy sales and donations.....	20,661.83
Pork and swine products.....	5,634.20
Poultry and eggs	984.72
Total	<u>\$43,163.96</u>

Statements of the different farm operations will be found in the pages following.

FINANCIAL.

Appropriations and expenditures for the fiscal year are shown in tables appended. The total expenditures for general maintenance, repairs and painting were \$279,384.64, making the per capita cost \$186.59. In addition to this amount \$12,970.87 was expended for specific improvements. The unexpended balance from appropriations amounted to \$39,852.88, which reverted to the state general fund.

RECREATIONAL.

For the successful and healthful upbuilding of mind and character in defectives, as well as in the normal, an abundance of recreation must be provided. To this end our children are given every opportunity for outdoor sports, such as baseball and basket ball, and other competitive games. Each building playground is equipped with swings, merry-go-rounds, teeter-boards and slides. A large central playground provides an opportunity for competitive games between the various school buildings and for special occasions, such as the Fourth of July. We have moving pictures, dances and musical entertainments each week during the colder months, and band concerts, or picnics out by the river at the Colony during the summer. We observe the various holidays, making very special occasions of the Fourth of July and Christmas. A victrola, piano or organ is provided for many divisions, but many more are required. Our band and orchestra frequently give entertainments for Sunday school picnics and for other welfare organizations outside of the School.

Religious services are conducted every Sunday morning, each and every child that is able taking part in the service. Instruction is given by the teachers and it is made as impressive and effective as possible.

IMPROVEMENTS MADE.

During the year many repairs and improvements have been made. The superintendent's living quarters have been completely redecorated and furnished, so that they now are very pleasant and comfortable. The teachers' rooms have been redecorated and the whole administration building rewired in conduit. Extensive repairs were made to the brick work in the boiler plant, and on the roofs of many buildings broken slate and gutters replaced.

The water supply at Black Hawk farm was insufficient, so that it was necessary to drill a new well. A complete pumping equipment was installed and the farm house equipped with modern plumbing.

NEEDS OF THE INSTITUTION.

By reference to the table exhibiting applications, it will be seen that there are 131 applications for females accepted pending room, of which 38 are for adults. Harper Lodge, the building for this class, has accommodations for 263, while there are 272 enrolled. The excess enrollment is being cared for in other departments, where they are taking the places of younger trainable children. Everywhere the adult female

defective is recognized as constituting one of the most serious menaces to present day society. The segregation of these potential mothers of social misfits will have a far-reaching effect in the solution of the problem of the feeble-minded.

I feel, therefore, that further provision should be made for this class. Although probably there are enough females of this class to populate a good sized institution, two units to accommodate 160 to 200 would do much to relieve the present urgent situation. In my opinion Black Hawk farm affords a favorable site for the construction of such a building. These could be so planned that they would constitute complete units, with day rooms, dormitories, dining room, kitchen and heating plant. They could also include a room for various industries. Such colony buildings would afford an abundance of opportunity for these women to engage in gardening, chicken and other poultry raising.

During recent years our School has been required to admit many helpless and crippled idiots and low grade imbeciles. They all require constant hospital care and are not trainable. There are now 29 of these in the hospital, but there are many others being cared for in other departments. Our present hospital facilities are inadequate to care for many more of these and still leave a sufficient number of beds to care for the sick. I feel, therefore, that a wing should be added to the present hospital that will be used exclusively for this class. Such a building will cost in the neighborhood of \$60,000.00.

The plumbing equipment in Sunset and the Boys' Cottage is in bad condition and, therefore, very unsanitary. An appropriation of \$10,000 should be made for each of these buildings to carry out this improvement.

There are many old wooden partitions in the wings of the Administration building that constitute a safe harbor and incubator for the propagation of bed bugs, cockroaches, etc. It is practically impossible to get rid of these pests as long as these partitions remain in place. A further advantage in their removal and replacement with a molochite, gypsum or pyrobar wall is that it would make these buildings practically fireproof. I believe that it would be possible to make these changes for \$2,500.00.

Both Sunset Cottage and the Farm Colony are inadequately ventilated. Some of the ventilators for the rooms of these buildings simply open into the attic. Air ducts should be fitted to these and run to stacks opening to the outside above the roof. It is estimated that \$1,500.00 will complete this work.

The cottage on the Parker farm is in need of extensive repairs. The foundation wall has fallen away in places and allowing the building to sag, cracking the plaster and otherwise damaging the building. Some of the rooms need painting and papering, and some structural changes would make it habitable and comfortable.

In the event that the legislature appropriates funds for buildings, the brick plant should be overhauled. The dry sheds and runways should be repaired and a new kiln constructed. The motor should be re-wired and some equipment should be purchased to put it in running order.

With \$2,500.00 for repairs and \$6,000.00 for running expenses we should be able to make a million brick.

The laundry is inadequate to care for the needs of the Institution. Its situation is such as to make it impossible to ventilate it properly; it is poorly lighted, and the whole plan makes it impossible to economically and efficiently do the school laundry. We should have a new building and some new equipment. To do this, we should have \$30,000.00.

The present situation in the boiler plant would, in the event of further accident to boilers, constitute a danger to the comfort, health and safety of the children. One boiler is completely and permanently out of commission, so that there is little or no margin of safety in the event of a further breakdown. There are some important repairs to be made to the brick wall about all the boilers. To purchase a new boiler and make these needed repairs we should have \$5,000.00.

On the night of July 31st fire destroyed our paint shop and a considerable stock of paint. We should have a fireproof building large enough and equipped to stock all paints, oils, gasoline and other inflammables. This should have a room in which furniture and vehicles could be refinished when necessary. I estimate that such a building would cost \$2,500.00.

The greenhouse is in a bad state of repair, and besides is not large enough to house all the plants and flowers, or to enable the propagation of plants for our extensive gardens. This could be remodeled and made large enough for our needs for \$1,000.00.

The pavements and walks all over the Institution grounds are in very bad condition, and we very badly need a pavement from State street up to the front of the Administration building. \$5,000.00, I believe, would meet the expense of these much needed improvements.

On account of the urgency of the season we were unable to complete the drainage of Black Hawk farm. \$1,737.55, therefore, reverted to the state treasury. We should have \$2,500.00 to complete this work.

I feel that a poultry industry could be a very profitable addition to the regular agricultural activities at this farm. To provide for this, a chicken house should be constructed. A shed should also be provided to shelter farm tools when not in use. The present shed is entirely too small.

CONCLUSION.

In conclusion I wish to record my appreciation of the splendid co-operation and support of the medical staff and all other employees through the trials incident to taking over the administration of the school. I wish also to express my thanks to the board of trustees, who have all individually and as a body tendered their sympathetic interest and support.

Respectfully submitted,

BYRON E. BIGGS,
Medical Superintendent.

REPORT OF ASSISTANT PHYSICIAN.

To the Superintendent:

The following is the report of the Medical Department of the Indiana School for Feeble-Minded Youth for the fiscal year ending September 30, 1922.

New admissions to the Institution are received at the hospital, where from fourteen to twenty-one days' isolation is observed. Nose and throat cultures, diphtheria susceptibility tests, intradermic bovine and human tuberculin tests, and Wassermann tests are obtained, as well as the usual complete physical and mental examinations and observations during the period of isolation. As soon as advisable, small-pox, typhoid and diphtheria vaccinations are given to cases needing them.

Of particular interest during the year was a rather extended epidemic of infective jaundice, comprising twenty-five cases with no serious complications or sequelae. We have been unusually free from any of the acute contagious diseases of childhood, attributed in part to the success of the diphtheria vaccinations and to the isolation and observation given to new admissions and to cases returning from furlough. As the detailed table will show, there were 2,275 admission to the hospital, upper respiratory infections and gastro-intestinal disorders comprising the greater number. In the dispensary there were 22,507 treatments given to minor ailments and conditions.

During the year there were twenty-six deaths, making the mortality rate 1.9% for those cases in residence. About 80% of the deaths were autopsied, and epilepsy, pneumonia, cardiac diseases, and pulmonary tuberculosis were found as the chief causes of death. Considering the number of cases under treatment on the fresh air porches, the number of deaths from pulmonary tuberculosis have been few.

I am grateful to the administration, the consulting staff, and to the hospital employees for their faithful co-operation.

Respectfully submitted,

L. POTTER HARSHMAN, M. D.,
Assistant Physician.

MEDICAL AND SURGICAL CASES TREATED.

REPORT OF RESIDENT DENTIST.

To the Superintendent:

The following is a complete report of the work of the Dental Department of the Indiana School for Feeble-Minded Youth for the year ending September 30, 1922.

Oral conditions of the children as a whole are exceptionally good. As the report shows, prophylactic treatment has been extensive. At present, and only partially included in the table appended, a dental survey of the entire School is under way with a thorough prophylactic treatment of the mouth of each child.

Extractions are numerous for two reasons. First, because some of the inmates have reached an age at which the extraction of their few remaining teeth and a subsequent fitting of full dentures is deemed the only course to pursue. Secondly, because some of the lower grade children, wholly unable to practice oral hygiene, have conditions in their mouths that make extractions advisable in order to eliminate sources of systemic infection. Those children suffering from oral infections not so far advanced as to necessitate extraction are admitted to the hospital and given daily treatment.

Each child is given a thorough oral examination upon admittance to the School. Records, both daily and permanent, are kept, showing exactly what work has been completed. Other records are kept which show work that may be done on certain children at some time in the future when conditions will be more favorable for what has been planned.

The assistance of the administrative and hospital staffs has been unlimited and their encouraging co-operation and support is greatly appreciated.

Respectfully submitted,
R. C. LEONARD,
Resident Dentist.

REPORT OF SCHOOL PRINCIPAL.

To the Superintendent:

The annual report for the School department for the year ending September 30, 1922, follows: The enrollment, counting out all duplicates, was 564. School was in session from September 19, 1921, through June 16, 1922.

GENERAL SCHOOL WORK.

"Happiness" was adopted as the motto of the School department, and by co-operative work we strove for it throughout the year. At 9 o'clock when the children reported for the first class of the day, they passed to the gymnasium and there sang and in unison said a morning prayer. The children enjoyed this, so we will continue the custom the coming year.

Programs relating to Hallowe'en, Thanksgiving, Christmas, Easter, Memorial Day, a minstrel in January and a patriotic play in February were successfully prepared by the teachers outside of regular school hours and given as Institution entertainments.

A record was instituted showing the child's daily schedule, personal habits and characteristics, mental age, physical age, and from year to year progress in school work.

GRADE WORK.

The State Manual of Courses of Study was used as the basis of scholastic work, and fair progress was noted. The children have been carried in grade work through the chronological age of 18, both the duller and brighter child receiving every possible attention for his or her advancement. The grades represented were through and including the fifth grade.

KINDERGARTEN.

In this department were enrolled many children of low grade mentality, the effort made being for their happiness, sense training and habit formation. Eight boys were advanced to the primary grade.

INDUSTRIAL, MANUAL AND ART WORK.

In the Industrial, as in all hand work classes, practical though attractive products were made. In domestic art classes, 48 stuffed animals were made for children's Christmas gifts. In the department is taught dressmaking, and 77 girls completed dresses before the close of the school year. We had only two looms for weaving carpet. Many of the younger children of lower mentality were taught plain sewing, crocheting, cutting and sewing carpet rags.

Drawing appealed to many of the brighter children. The boys in these classes worked with coping saws, making many toys that were painted by the girls, and these will be used this coming Christmas.

MUSIC AND PHYSICAL TRAINING.

The children in these departments made considerable advancement during the year as was shown in the many concerts, recitals and demonstrations. The girls' orchestra now numbers 22, and the boys' band, 16 players.

THE EXHIBITS.

Exhibits showing examples of the children's work in the School and Industrial departments, were taken to the State Conference of Charities and Correction at Muncie and the State Health Exhibition at Indianapolis.

There are in all 15 teachers associated with me in the school work proper. These include the instructors of band and orchestra, and two male instructors, one in manual and the other in sense training. I feel that they have as an aim the happiness of the children and the making of the Indiana School a credit to the State.

With the trust to gain your continued sympathy and co-operation,

Respectfully submitted,

THERESA A. DOYLE,
School Principal.

REPORT OF PSYCHOLOGIST.

To the Superintendent:

Beginning September 4, 1922, the Department of Psychology was organized as a separate department with a staff consisting of one examiner, and with plans for increase in the department as development permits. During the month of September fifty children were examined. The source and reason for selection of these fifty children is disclosed in the following table:

Individual Examinations September, 1922.

	<i>Institution</i>			<i>Out-Patient</i>		Total
	School	Parole	New Ad- missions	Red Cross	Juvenile Court	
Male	0	0	5	1	1	7
Female	29	10	0	0	4	43
	—	—	—	—	—	—
	29	10	5	1	5	50

The children examined for the School department were selected by the Principal to help in determining which children are not mentally able to profit by further scholastic teaching and whose removal would make room for more trainable children. The mental ages in this group varied from two to six years in the sixteen lowest grade children, to a distribution between six and ten years mental age in the other thirteen. Selections for removal were made in the School department on the basis of the information received from the Department of Psychology. Among the school children there is one deaf girl who appears normal and for whom transfer to the Indiana School for the Deaf was recommended.

The ten girls under consideration for parole include girls from the West Wing and Harper Lodge. The psychological examination made in these cases revealed high mental ages and some of them were recommended for parole. In some of the cases, this department recommended against parole, in spite of high mental ages, because of the presence of personality traits and temperamental difficulties which would seriously discount the ability of the patient to adjust herself in the community, even under close parole supervision.

OUT-PATIENT SERVICE.

This service represents the effort of the Indiana School for Feeble-Minded Youth to help in solving the social problems of the community and to elucidate the educational difficulties where our advice is sought in this matter. Patients were brought to this clinic from Fort Wayne and from other places in Allen County. The sources during the month of September were the Red Cross and the Juvenile Court of Allen County

Provisions for the six children examined here were made in accordance with the advice furnished by our clinic.

METHODS OF EXAMINATION.

The materials used in the Psychological laboratory consist of the Binet-Simon Measuring Scale for Intelligence, ten performance tests and apparatus for Anthropometric Measurements (height, standing and sitting, weight, grip, and vital capacity). The Binet test is a routine matter in all examinations where the patient is able to respond to questions. Performance tests are graded to various levels and are, therefore, selected to meet each individual case.

An individual case history includes ten fields of inquiry, whether the patient is an inmate of the institution, or one who is poorly adjusted in the community. These ten fields of inquiry are Physical, Family History, Personal and Developmental History, History of School Progress, Examination in School Work, Practical Knowledge, Economic History, Social History and Reactions, Moral Reactions, and the results of Psychological examination. Proper adjustment, either in the institution or in the community, cannot be accurately attained unless such detailed knowledge as that yielded by this study is available.

ACKNOWLEDGMENT.

Acknowledgment is hereby made of the efficient and complete cooperation extended to the Department of Psychology by each department of the Institution with which contacts were made.

Respectfully submitted,

EDNA R. JATHO,
Psychologist.
